INFORMATION TECHNOLOGY SOLUTIONS THAT WORK FOR YOUR BUSINESS.

Product Overview: Another strong application from InOps Simplifying IT Operations. InOps Migration tool Simplifies UC migration (Avaya to Cisco) Process. Use of this tool simplifies migration effort and reduce overall configuration effort upto 70%.

What it does: We all know about the challenges of system migration. In an environment where two migrating systems are very different, our tool ensure error free station & user provisioning. This application provides all avaya (Red & Blue) system parameters in cisco readable format. Use of this application reduces the dependency of Avaya skilled resources for migration activity.

System Requirements: To run Migration Tool the client PC should be at least: 64-bit OS, recommended 4 GB RAM, i5 CPU or better, Migration Tool is a client application that installs on Microsoft Windows operating system.

Licensing: INOPS Migration Tool is licensed product. Licensing is based on Number of Station (End Points) being generated.
